When Disaster Strikes

Building Safety Evaluator

An ICC course for the people communities rely on after an emergency.

If your organization may be part of the response or recovery,
this conversation includes you...

FIRE SERVICE • BUILDING SAFETY • EMERGENCY MANAGEMENT • LAW ENFORCEMENT
CODE ENFORCEMENT • PERMIT TECHNICIANS • PLANNING & ZONING
PUBLIC WORKS • ENGINEERS & ARCHITECTS • LOCAL GOVERNMENT

The first time you're asked to help shouldn't be the first time you've thought about what comes next.

December 4, 2026 • 8am - 4pm • Hermiston City Hall, 180 NE 2nd St Hermiston, OR 97838

Response doesn't happen in silos.
Neither should preparedness.

WHY SHOULD YOU ATTEND?

Because when something goes wrong in your community, someone with your experience may be asked to help.

That's a terrible time to start figuring out how the process works.

WHAT WILL YOU LEARN?

The **When Disaster Strikes (WDS) - Building Safety Evaluator Training** prepares participants to understand their role in post-disaster response and conduct rapid, consistent Building Safety Evaluations.

The course covers:

- Emergency management fundamentals
- Post-disaster roles and responsibilities
- Operational environments and hazards
- Evaluator training and credentialing requirements
- Hands-on practice performing building safety evaluations

FEMA / NIMS RECOGNIZED TRAINING

This technical-level training is recognized by FEMA and identified as required training in the NIMS Post-Disaster Building Safety Evaluator typing document.

Participants completing the training may also qualify to obtain ICC's accompanying Credential of Learning Achievement (CLA).
