Residential Energy Code Compliance Overview & Live Q&A

Presented by **Mark Heizer**, Mechanical and Energy Code Engineer, Oregon BCD

Earn 0.3 ICC or CCB CEUs

October 9th | 1:00 pm - 4:00 pm | Hamley's Steakhouse - Slickfork Room | Includes snacks!

Join Mark Heizer for a relaxed, interactive session designed around **your questions and real-world challenges** with residential and commercial energy code provisions.

Energy codes can be confusing - whether you're implementing them in the field or explaining requirements to customers. This is your opportunity to **get clarity directly from Oregon's subject matter expert** in a comfortable, discussion-based environment.

Come Prepared to Engage

Make the most of your time with Mark by watching BCD's three-part Residential Energy Code for Beginners series beforehand. These foundational videos go beyond the standard code update training to provide comprehensive background knowledge:

- **Build your foundation** with beginner-friendly explanations
- Go **deeper** than the 2023 ORSC **Chapter 11 updates**

Pro Tip: Don't overlook the **Technical Bulletins** and **updated Envelope trade-off calculator!** These often-missed resources are goldmines of practical information. Mark's expertise extends to these areas too, so **bring your questions!**
